

Kit Includes "SPIGOT"

Utilizing the very high performing Gutta Sump, the overflow allows building designers to specify with confidence without concern to the changing weather . Sceptic or not it makes sense to give your client at the best for so little cost

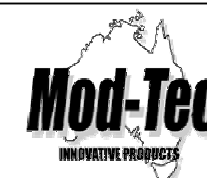

There are a range of methods to dispose of the Overflow with a range of outlets to simplify the selection for designer & Installer.

Options are based on the many conditions that are encountered on most sites. Refer to additional drawings.
